

City of Raleigh

Subcontractor of the Year

FY 2018 - 2019

Amber Daniels

President, Asphalt Services on Demand, Inc.

Amber Daniels is the President of Asphalt Services on Demand, Inc., a HUB and DBE certified firm providing quality commercial, industrial, residential, and DOT asphalt services across North Carolina. While asphalt paving, patching and milling are specialties, the firm also provides hauling services to complete its repertoire.

Asphalt Services on Demand, Inc. has completed numerous projects for the City of Raleigh. Some of those projects include Ramblewood Drainage, White Oak Lake Reconstruction, Lower Poplar Creek and others. The company started as a homebased business with only one company truck, one asphalt paver, one

asphalt roller, one skidsteer and two employees. Six years later, ASD has over 20 employees, a fleet of company vehicles and, as Amber states, "more paving and milling equipment than I "never" could have imagined!" Amber further stated, "the opportunities made available to us by the City of Raleigh, along with our loyal, faithful, and hardworking employees, have helped to ensure the long-term success of the company".

Amber has a Business Management degree from UNCW, General Contractors License in Heavy Highway, and Construction Management Diploma from North Carolina State University.
